

Care Manager

<Name Here>

<Practice Name Here>

"My Name is _____ . I am a Care Manager with Dr. _____'s office.

Helping you manage your health care needs

_____ is a care manager in _____ who works closely with your primary care physician. Your physician has requested that you talk with _____ about your health care needs.

A care manager is a member of the physician office team who works with you to tailor goals that meet your individual needs. Working on health goals can lead to an improvement in your health and quality of life. This may be achieved by:

- Reviewing your health information**
- Providing education on your specific health issues**
- Helping you create personalized goals**
- Connecting you with available community resources, such as help with prescriptions, transportation or insurance**
- Helping you understand the medications you are taking which includes how often you should be taking them, purpose of the medications**
