

# Pediatric Care Manager

<Name Here>

<Practice Name Here>

“My Name is \_\_\_\_\_ and I am a Pediatric Care Manager with Dr. \_\_\_\_\_’s office. I work with you and your doctor to help children, adolescents, and their families with their health goals.

## *Helping you & your child or adolescent to address health care needs*

\_\_\_\_\_ is a care manager in \_\_\_\_\_ who works closely with your pediatrician. Your pediatrician has requested that you talk with \_\_\_\_\_ about your child’s health care needs.

Together the care manager partners with you, your pediatrician and the health care team to achieve overall health. For example, a care manager may work with families and children or adolescents who have health concerns such as healthy weight, asthma, attention deficit hyperactivity disorder and/or behavioral health needs. They help children, adolescents and parents establish goals that can lead to an improvement in their health and quality of life. This may be achieved by:

- Reviewing the child or adolescent’s health information**
- Providing education on specific health issues**
- Helping to create personalized goals**
- Connecting the patient and family with available community resources, such as help with pre-  
scriptions, transportation or insurance**
- Helping you understand the medications your child or adolescent is taking, which includes how often to take them, and the purpose of the medications**
